

THE SIGN OF KOSHER

KOSHER 101

Demystifying Kosher

The essentials of kosher for certified companies.

Kosher Without Compromise

What Will We Learn Today?

1. Basic Principles of Kosher
2. Kosher Symbols and Certifications
3. Benefits of Kosher Certification
4. Certification Process
 - Manufacturing
 - Private Brands
5. Introduction to OK Kosher

Introduction to Kosher Certification:

- **Understanding Kosher:**

At its core, kosher certification is rooted in the dietary laws observed by the Jewish community. These laws dictate what is considered kosher, encompassing various aspects such as the types of animals and ingredients used in food preparation.

What are the segments of **Kosher Consumers?**

- Jewish people who observe Kosher Dietary Laws.
- Jewish people who buy kosher products on a seasonal basis (i.e. entertaining or during holidays).
- Several other religious groups.
- **International consumers who perceive kosher as of a superior quality, purity and healthier (this is the majority segment!).**
- Lactose intolerant or dairy-allergic/sensitive consumers seeking the non-dairy products.
- Vegans and vegetarians, also seeking verification of dairy- or meat-free foods.

What Kosher *Is Not.*

A Rabbi blessing the food. It is not a guarantee of quality or a healthiness.

Kosher certification is not a single universal standard. Different Jewish communities and sects may have different standards when it comes to Kosher certification.

So, What is **Kosher *Certification?***

In order to certify any production as kosher,
we verify and monitor **two main components:**

**Kosher
Ingredients**

**Equipment
Maintained
as Kosher**

Kosher Ingredients

We categorize ingredients as either:

1 Inherently
kosher

2 Eligible to
become kosher

3 Inherently non-
kosher

When we use the term “ingredients”, we’re including additives, preservatives, and processing aids, such as anti-foam, release agents, etc.

Now, On To **Kosher Equipment**

- Any equipment used to produce non-kosher, or came into contact with non-kosher material, **must be cleaned and “koshalized”** before it may be used in kosher production. This can entail one or more of several procedures such as boiling, sanitizing or running with use of a bittering agent.
- The transport of **bulk liquid kosher ingredients** requires upholding kosher transportation procedures.

Let's Get Into Some
Basic Rules of Kosher.

1. Meat/Poultry

- Total separation of dairy and meat/poultry *is always required.*
- Meat and poultry require kosher ritual slaughtering and draining, and only animals of a **kosher type** are permitted to be eaten.

2. Dairy

- **Dairy certification** has an optional, second tier of certification, known as *Cholov Yisroel*, which requires extra supervision.

3. Pareve

- Foods which are **neither dairy nor meat/poultry** are termed ***Pareve***, or “neutral.” Produce, eggs from kosher animals and kosher varieties of fish are among those deemed Pareve.

4. Kosher for Passover

- **Kosher for Passover** is a separate certification tier and symbol (OK P). It applies for 8 days of the year, is sought by Jewish consumers and precludes the use of certain, specific grain ingredients.

Symbol & Certification Bodies:

You'll often find specific symbols or labels on packaging. These symbols represent reputable kosher certification agencies or bodies. For instance, the Orthodox Union (OU) and OK Kosher Certification are the most widely recognized and trusted symbols that indicate compliance with kosher standards.

There are over 1000 agencies in the world. How will you know how to navigate between them?

The Kosher Symbols and How They're Used.

K	→	Pareve
K D	→	Dairy
K M	→	Meat
K F	→	Fish
K P	→	Passover

The OK Kosher symbol should be printed clearly and large enough that consumers can easily see it! We also recommend it be **prominently displayed on your packaging**, alongside any other certifications, to *maximize your investment in kosher.*

Benefits of Kosher Certification:

Obtaining kosher certification comes with several benefits:

Kosher certification plays a vital role in building consumer trust. It provides an added layer of quality assurance and compliance.

According to industry reports, the demand for kosher food has been steadily increasing, with a growing consumer base worldwide. This presents a significant market opportunity for private brands to tap into and capitalize on the increasing demand for kosher-certified products.

How we can help you?

- Existing OK Kosher certified manufacturers
- Specific manufacturers you would like to work with.
- North America
- International

Contact: rfriedman@ok.org

and we will be delighted to assist you in finding suitable options.

Manufacturing VS. Private Brands

- Private Brands Customers of OK Kosher certified manufacturers can gain certification of their own products, with the use of the OK Mark on the product by paying a minimal annual fee upon completing a brief written agreement.
- If the manufacturer is not currently kosher certified, OK Kosher would be happy to assist them in obtaining kosher certification for their products or even solely for your product.

K Manufacturing Certification Process in 5 Steps

1

Receive an **Initial Inspection Visit** from a **Rabbinic Coordinator (Rabbi)**.

2

Submit **ingredients, raw materials & labels** for approval.

3

Receive your **customized kosher guidelines** within the signed **Certification Agreement**.

4

Have an **OK Field Representative** assigned to visit your facility for drop-in visits (if applicable) throughout the year.

5

Your **OK Kosher certificate(s)** will be issued, upon which your company would be certified!

Timeline for Certification

When You Can Start Producing Kosher

Our objective is to **get you certified within 4-6 weeks.**

Factors which could affect this are the date of your Initial Visit, and the receipt and processing of ingredient data and signed agreement.

Maximize Your Kosher Investment by Using
Product Label Review
To Your Advantage

We provide the high-res file of our certification mark, in order for you to benefit the most from displaying your OK certified status.

All labels for finished products must match the kosher certificates issued to your company, for **accuracy and clarity to the consumer.**

Contractual and Financial Obligations

- Application and Review Process:
- Certification Fees:
- On-site Inspections and Audits:
- Ingredient and Supplier Verification:
- Labeling and Packaging Requirements:
- Ongoing Compliance:

Rabbinical Visits

To Your Facility Will Include

Annual Executive Visits from your **Rabbinical Coordinator (RC)**. Each certified company is assigned a dedicated RC who designs a tailored kosher program and keeps track of its success.

Unannounced Visits from a **Rabbinic Field Representative**, or *mashgiach* in Hebrew. These reps are more locally-based to each facility, and trained to inspect the operations for kosher compliance.

Special Productions and **Kosherization Visits**, also conducted by an OK Kosher Field Representative, where necessary.

GET CERTIFIED AS A PRIVATE LABEL BRAND

How to Obtain a Private Agreement with OK Kosher Certification

THE PRIVATE LABEL APPLICATION PROCESS

Register your private label products in four simple steps.

1

COMPLETE YOUR
APPLICATION

3

PAY YOUR INVOICE

2

SIGN AND RETURN
YOUR PRIVATE LABEL
AGREEMENT

4

SUBMIT PRODUCT
LABELS

CONDITIONS FOR CERTIFICATION

To be certain you're ready to go, please check these criteria before beginning your application.

PRODUCTION LOCATION

Approved private label products can be produced ONLY by the OK certified company listed in the PLA. The private label entity is not authorized to manufacture any products that will be labelled or marketed as OK Kosher certified.(That would require a standard kosher certification agreement with OK Kosher).

LABELING LOGISTICS

Either the OK - certified manufacturer or the PL entity may submit labels for approval. However, only the OK manufacturer may store the labels bearing the OK symbol. Furthermore, the PL entity is not authorized to package or label any OK certified products.

MARKETING & SELLING PRODUCTS

The PL entity is only authorized to market and sell products packaged in their final labels/packages, as received from the manufacturer. See our guide to the proper use of the OK Symbol.

GOOD TO KNOW

Here are some helpful tips when applying for OK Kosher Certification as a Private Labeler.

POTENTIAL PROCESSING DELAYS

We strive for the best service possible at all times. However, processing delays can happen, so bear with us. Here are some scenarios that slow us down:

- » We receive an application from you that's incomplete or inaccurate.
- » There are handwritten notes on your PLA document.
- » An unofficial version of the OK Kosher symbol was used (wrong font, added graphic elements, etc.).
- » Labels were printed with the OK Kosher symbol before approval.

Avoiding these mistakes will allow the certification of your products to be a quick and smooth process.

PRODUCT SUBMISSION

Every OK-certified product has a unique K-ID (Kosher ID). The manufacturer's K-ID is required for each PL product you wish to have certified and ensures that the correct product is used in your application. You can obtain the K-ID's from your OK-certified manufacturer.

USEFUL TO HAVE

Please provide us with complete contact details of the main point person responsible for the private label account. We would also appreciate a backup contact person in the event the main contact is unavailable.

A little about **The Ⓚ and who we are.**

- **Founded in 1935**, with kosher certification as the sole focus, we are a **non-profit organization** providing for the industry and serving kosher consumers.
- **OK Kosher is the global benchmark** for kosher standards in all sectors. The **OK symbol** is the most **instantly recognizable** kosher certification mark in the world.
